Summary

Master of Science in Business Analytics from University of California, Irvine with hands-on experience analyzing operational and workforce data, and reporting processes in collaboration with Kaiser Permanente using Python and Power BI. Skilled in SQL, Tableau, R, and presenting data-driven insights to cross-functional stakeholders.

SKILLS

Programming & Databases: SQL, Python, R, MongoDB

Data Visualization & BI: Power BI, Power Automate, Tableau, Microsoft Excel, SharePoint, Data Storytelling

Analytics & Modeling: Machine Learning, Statistical Modeling, Regression Analysis, Forecasting, Predictive Analytics, EDA

WORK EXPERIENCE

Kaiser Permanente

Pasadena, CA

Student Data Analyst

Jan 2026 - Present

- Analyzed 23,115 CRM intake records across 20+ HR Operations teams, finding 3 teams managed 65% of requests with turnaround times ranging from 5.3 to 71.9 days, revealing workload concentration and staffing gaps.
- Designed a Python-based employee segmentation model classifying 92 employees into 4 groups using productivity, turnaround time, and case complexity metrics to support staffing and process analysis.
- Developed operational KPIs including completion rate, delay ratio, and complexity-adjusted turnaround time, identifying teams falling below the 93.2% completion rate with gaps as wide as 66 days.
- Delivered Power BI dashboards and presented data-driven findings to stakeholders, supporting operational decision-making for a capstone initiative addressing 8–10x request volume growth since 2020.

Residential Private Property

Riverside, CA

Property Manager

May 2022 - Dec 2025

- Managed all aspects of a residential property, including tenant communication, lease execution, and move-in coordination, ensuring smooth operations and positive tenant experiences.
- Utilized Excel to track rental payments, late fees, and tenant turnover, creating reports that streamlined rent collection and supported higher occupancy rates.

DSV Global Transport and Logistics

San Francisco, CA

Data Operations Associate

Sept 2022 - Feb 2023

- Analyzed and maintained shipment data for Lucid Motors orders, processing 100+ daily entries while resolving carrier-related issues to reduce delays by 15%.
- Coordinated shipment requests, including quotes, schedule changes, and status updates, achieving a 90% on-time resolution rate and improving response turnaround time.
- Used SQL to retrieve, filter, and analyze shipment data, improving shipment tracking reporting and reducing manual processing time.
- Prioritized and coordinated 100+ monthly ocean and air shipments based on NIP deadlines and urgency, improving on-time delivery performance by 12%.

PROJECTS

Retail Demand Forecasting - Python, scikit-learn, pandas, Random Forest

- Developed and evaluated ML forecasting models on 1M+ rows of Rossmann sales data, with random forest achieving 9% lower RMSE and higher predictive accuracy than linear regression (R^2 : 0.296 vs. 0.150).
- Analyzed promotional impact on store-level sales trends, identifying a 20–30% median demand increase to support inventory and staffing planning.

Hotel Booking Demand Analysis - | MySQL

- Queried and segmented 119K+ hotel bookings with 20 SQL queries, identifying a 37% cancellation rate and \$4.6M in lost revenue across channels, deposit types, and lead-time categories, visualized in Power BI.
